

# Job# 12506069 – 2026 World Cup Creative Development

## Background

The World Cup 2026 is a major event drawing fans from all over the nation and the world. Beginning June 13, The New York/New Jersey stadium will host 8 matches - including the biggest and most important one of all: the World Cup Final on July 19.

This presents a key opportunity to encourage visitors to explore New York State between matches or extend their stay by highlighting the region’s diverse, world-class destinations.

## Objectives

To promote World Cup visitors to explore New York City & New York State, and to raise awareness about all the world-class attractions NY has to offer

To drive traffic to the ILNY FIFA World Cup landing page

Important distinction - it is not our goal to encourage World Cup ticket sales or travel to the World Cup. Our goal is to encourage people to explore beyond the World Cup events while they are here.

## Creative Direction
